Affiliations
Latham Centers maintains group homes in local residential neighborhoods throughout beautiful Cape Cod and Southeastern Massachusetts close to work sites and social, recreational and healthcare resources. Staff provides residents with the necessary supports to attend school, work and activities in the community.

- Co-Ed Population (ages 22+)
- Prader-Willi Syndrome
  (and other syndromes with hyperphagia)
- Depressive Disorders
- Anxiety Disorders
- Mood Disorders
- Post Traumatic Stress Disorders
- Asperger’s Disorders
- Bipolar Disorders

Prader-Willi Syndrome (PWS) is a life threatening genetic disorder that manifests itself with insatiable appetite, mild to moderate developmental delays, and emotional and behavioral problems. The syndrome occurs 1 in 12,000 to 15,000 births on average, and is found in all races and ethnic groups. One child is born every day with Prader-Willi Syndrome.
